## DGS' resources

According to the law, DGS can invest in:

- romanian T-Bills and other sovereign securities;
- term deposit, certificates of deposit and other financial instruments of the credit institutions;
- government securities issued by the EU Governments and U.S. T-Bills.

## DGS' resources

## Investment strategy

- The main objectives of the FGDB's strategy are lower risk, liquid placement and, as a complementary target, their return;
- To reach the annual coverage ratio of deposits and budget target;
- FGDB's investment strategy is implemented by the CARF and followed-up by Treasury Department;
- FGDB works with banks selected from the 33 member of DGS and 2 non-member, based on market ratio and index of Capital Asset Management, Profitability and Liquidity

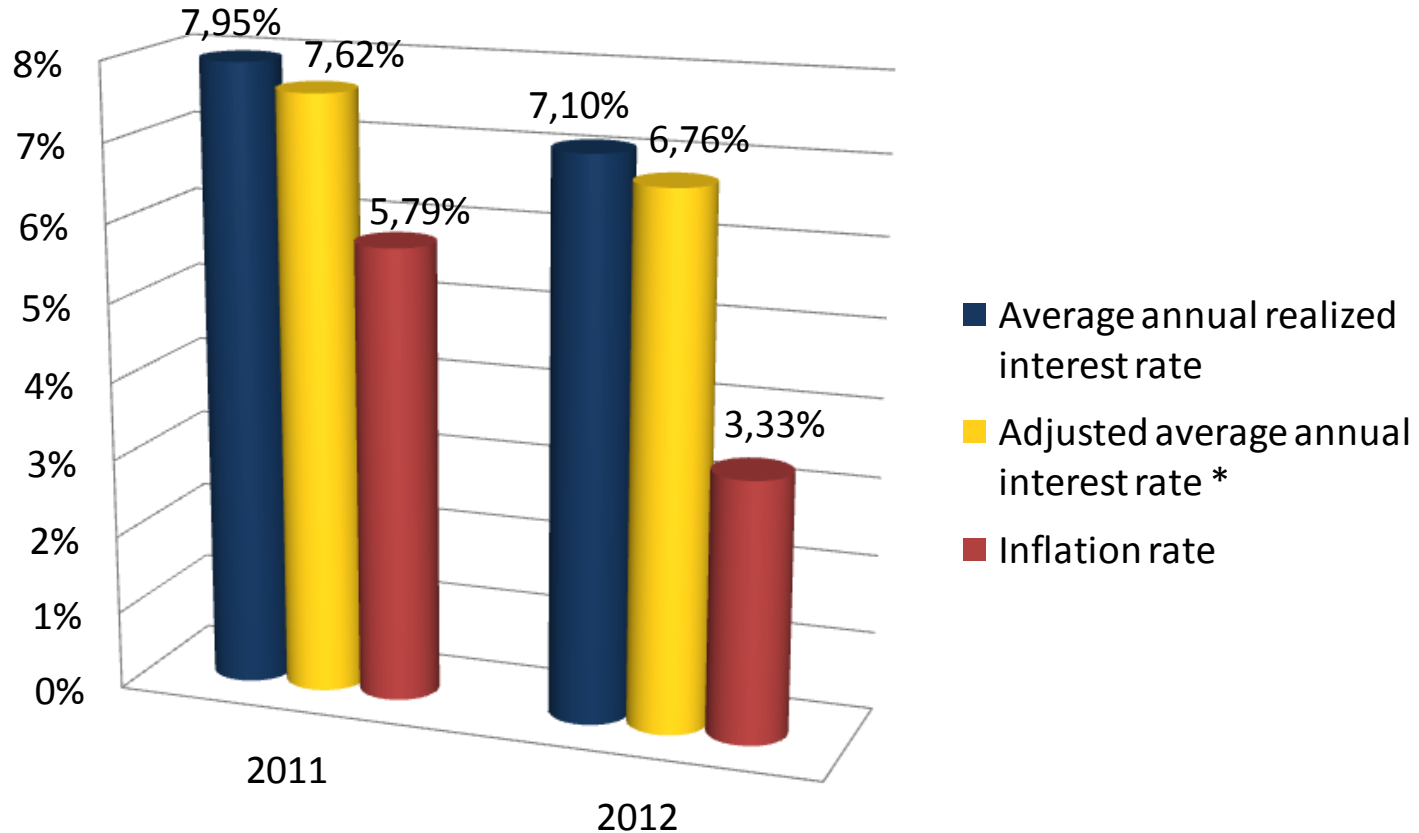

## Investment strategy

### Mandatory guidelines:

- monthly liquidity not less than 10%, based on prevailing conditions in the market
- balanced exposure between short and long term maturities
- max. exposure quota per bank set by investment strategy

## Outcomes

\* Adjusted Interest rate calculated in terms of ROBID (Romanian Interbank Bid Rate) and fixing for government securities
